Dinnative Technologies

About Us

Dinnative Technologies is a leading digital cognitive software company based in Johannesburg, South Africa. Founded in 2017, we specialize in developing innovative solutions that cater to the changing requirements of the 4th industrial revolution. Our mission is to create apps and systems that are not only cutting-edge but also transform the way we perceive technology.

What sets us apart is our commitment to delivering exceptional results on time, using the right tools and a highly skilled team. We take pride in our ability to seamlessly integrate with our clients' teams and tackle complex projects with ease. Our team consists of experienced professionals from diverse backgrounds, including software engineers, UX/UI designers, data analysts, and project managers, who work together to deliver comprehensive solutions that drive business growth.

Case Study: bmfonline.co.za - Black Management Forum Private Community Portal Secure Membership Portal & Mobile App

The Black Management Forum (BMF) is dedicated to empowering black managers in South Africa. They wanted to improve their online community and approached Dinnative for a secure membership portal.

Challenge

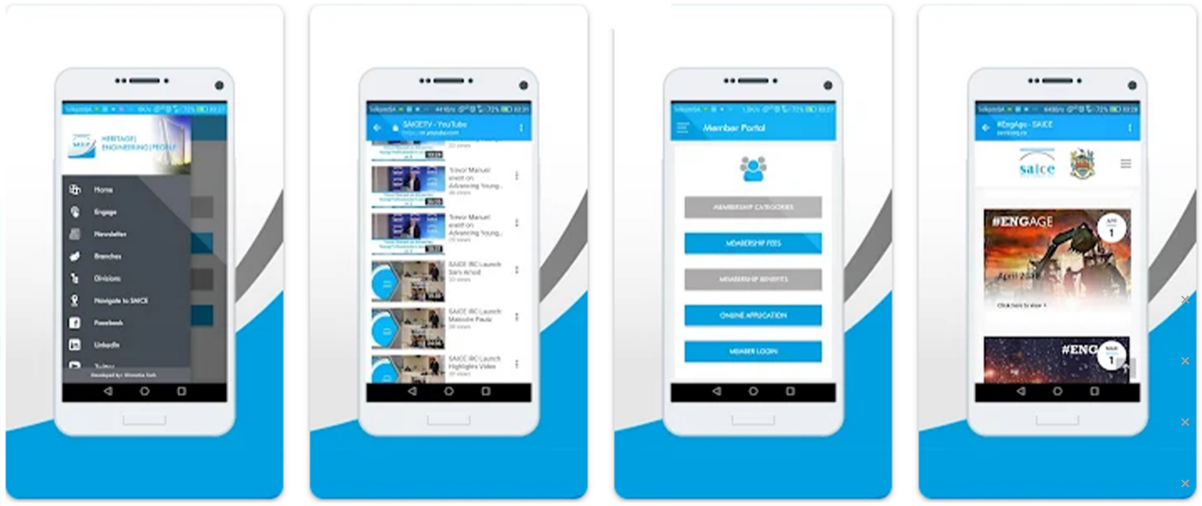

BMF's existing system was outdated and couldn't handle their growing membership needs. They needed a platform to manage profiles, subscriptions, facilitate communication, deliver content, and ensure data security.

Solution

Dinnative developed a custom membership portal with a user-friendly interface, robust security measures, membership management tools, online community features, content management system, and mobile responsiveness.

Case Study: Driving Engagement with Custom Mobile App for SAICE

The South African Institution of Civil Engineering (SAICE) is a leading professional body for civil engineers in South Africa. Dinnative partnered with SAICE to create a custom mobile app aimed at improving member engagement and digital interaction.

Challenge

SAICE lacked effective digital tools to engage its members and needed a solution to enhance communication, resource access, and overall member experience.

Solution

Dinnative developed a comprehensive mobile app with features such as in-app messaging, resource libraries, event management tools, networking functionalities, and personalized content delivery.

Case Study: varsitytv.co.za - Black Management Forum Private Community Portal Secure Membership Portal & Mobile App

Varsity TV, a prominent platform for South African university sports and entertainment, sought a website overhaul to boost audience engagement and align with their brand's energy.

Challenge

Their existing website lacked modern design and struggled with user experience, necessitating a refresh to provide a seamless digital environment.

Solution

Dinnative utilized its web design proficiency to revamp Varsity TV's website, delivering:

- Modern Design: A fresh and dynamic look reflecting Varsity TV's brand identity.
- Enhanced User Experience: Intuitive navigation and responsiveness for optimal viewing across devices.
- Engaging Content: High-quality visuals and user-generated content for an immersive experience.

Case Study: mymentorafrica.com – LMS, Mobile App , Community Forum My Mentor Africa

Dinnative Technologies collaborated with MyMentor Africa to develop an LMS, mobile app, and community forum, and with Engineer Connect Forum to create a specialized platform for engineers seeking ECSA registration.

MY MENTOR AFRICA
MENTORSHIP | ENGINEERING | CANDIDATES

Challenge

MyMentor Africa faced challenges in providing structured learning content and fostering a collaborative community, while Engineer Connect Forum needed a streamlined platform for engineers navigating the ECSA registration process.

Solution

Dinnative delivered tailored solutions for both organizations:

•For MyMentor Africa: A robust LMS featuring interactive courses, progress tracking, quizzes, and mentorship matchmaking capabilities. A mobile app offering on-the-go access to course materials, mentorship resources, and community discussions. An interactive community forum for knowledge sharing and networking.

•For Engineer Connect Forum
